

A REWARDING CAREER ISN'T JUST A PIPE DREAM!

There isn't one set path to success at Century Fire Protection! With continuous learning, certifications, and professional development, employees at Century can unlock their full potential and achieve long-term career growth.

SPRINKLER DESIGNER TRAINEE

0-1 yr
EXPERIENCE

WHAT DOES A DESIGN TRAINEE DO?

A Fire Sprinkler Design Trainee starts out surveying existing fire protection systems in the field, then focuses on acquiring knowledge in designing different types of automatic sprinkler systems, learning how to work with blueprints, digital design programs, preparing submittal packages for approval, and gaining an understanding of fire sprinkler and building codes.

HOW CAN A DESIGN TRAINEE ADVANCE?

A Fire Sprinkler Design Trainee can advance to a Sprinkler Designer after demonstrating the ability to independently create designs, perform calculations and fabricate lists. Pursuing additional training and NICET certification to strengthen their credentials is also recommended.

FIRE SPRINKLER DESIGNER

1-3 yrs
EXPERIENCE

WHAT DOES A FIRE SPRINKLER DESIGNER DO?

A Fire Sprinkler Designer is responsible for designing fire protection systems that meet NFPA 13 and local fire and building codes across industrial, commercial and residential settings. In addition to creating detailed designs, key duties include obtaining approvals and permits, calculating systems, adhering to allocated project hours and preparing documentation for design approval and job completion. Designers also conduct field surveys, assist with installation issues and manage final job close-out documents.

HOW CAN A SPRINKLER DESIGNER ADVANCE TO A MANAGER?

A Fire Sprinkler Designer can advance to a Manager after 5 or more years demonstrating proficiency in fire sprinkler system design, as well as fire code and building codes for a variety of building types. Managers also demonstrate excellent leadership skills and the ability to mentor and develop a team. Pursuit of NICET certification is also recommended.

FIRE SPRINKLER DESIGN MANAGER

5+ yrs
EXPERIENCE

WHAT DOES A SPRINKLER DESIGN MANAGER DO?

In addition to the responsibilities of a Designer, the Sprinkler Design Manager leads the Design Team, mentors team members, and serves as the expert of the Design Department. The role requires collaborative work with Project Managers and Field Superintendents ensuring a smooth transition from design to implementation. Additional key responsibilities include managing project schedules and conducting surveys, calculations and stock listings as needed to meet timelines.
